

IFIC FLARE

The Arson Prevention Forum released its 'State of the Nation Report 2017' on October 11, 2017.

This is the second report with the last being issued in 2014.

At a time when the fire community and the country's focus is on the Grenfell disaster the contents of this report draw attention, amongst other things, to the upward trend in deliberate fires and the increasing cost to the community and insurers.

Arson is often seen as a property crime but, in reality, it is a violent crime perpetrated against an individual, group, business or community, the consequences of which are far reaching and in some cases irreparable.

A full copy of the report can be found [here](#).
